

Junior Full Stack Developer Intern

TechNova Solutions — Bengaluru, India (Hybrid)

About the Role

TechNova Solutions is looking for a Junior Full Stack Developer Intern to join our product engineering team. You'll work on our internal platform, building features end to end across the backend and frontend, and collaborating closely with senior engineers on code reviews and design discussions.

Requirements

Must have hands-on experience with React, Node.js, Express and MongoDB, and be comfortable building and consuming REST APIs. Solid understanding of JavaScript fundamentals and Git-based version control workflows is expected.

- 0-1 years of professional or internship experience in software development
- Bachelor's degree in Computer Science, Information Technology or a related field preferred (final-year students may also apply)
- Comfortable working in a fast-paced, collaborative environment

Preferred Qualifications

Experience with TypeScript, Docker and AWS is a strong plus. Familiarity with CI/CD pipelines and basic Linux/shell usage is also nice to have, though not required.

Responsibilities

- Build and maintain REST APIs for the internal platform using Node.js and Express
- Collaborate with the frontend team on React components and shared UI patterns
- Write unit tests for backend services and participate in code review
- Work with MongoDB for data modeling on new features
- Participate in sprint planning and daily standups with the engineering team

What We Offer

A 6-month paid internship with mentorship from senior engineers, exposure to a production codebase, and a strong possibility of a full-time offer based on performance.
